 Cable cutting	 Pressure force	 Aluminum	 Min. fugue thickness	 Clean the gluing surface	 Shears jaw hardness
 Adjusting the clamping force	 Drilling	 Rubber	 Solid construction	 Sticky lasts for 14 days	 Two-component grip
 Working range of jaws	 Machine cutting	 Cube cut	 Aluminum trigger	 Resistance UV	 Steel frame
 Jaws width	 Painting nuts and bolts	 Sponge pad	 Writing line thickness	 Spray painting	 2 cutting angles
 Jaw opening	 Painting rims	 Hardened steel	 Glass	 Leather	

...cater
to every
user's
requirements

► **MODECO EXPERT** is a brand of power tools and hand tools that cater to every user's requirements! With our tools at your disposal, you can successfully complete any construction work.

We have been developing our portfolio for over 25 years to meet the expectations of our customers. We stand out in the market with the experience and expertise acquired for long years, translating into your joy and satisfaction with the use of our products. Every day, we seek to develop new solutions which will make our brand your preferred choice. The quality of our power and hand tools is the guarantee that we truly mind the needs of our customers and strive to match them by adapting the products accordingly.

What we also consider extremely important is the concern for natural environment. This is precisely why we make sure that our production processes do not contribute to environmental damage and cooperate with waste management experts. Additionally, we intend to go completely paperless with our catalogues over the next two years, and this will involve gradual reduction of print runs. We have made this decision as a socially responsible company that does not want to contribute to further deforestation.

Following the requirements of this day and age, and these undoubtedly include digitisation and environmental awareness, we encourage you to use our electronic catalogues, available at <https://www.modeco-expert.com/en/> under <https://www.modeco-expert.com/en/>. In terms of content, they are a perfect match for the paper catalogue versions; they can be downloaded to any data carrier as PDF files, and they enable easier navigation and product search as an additional advantage. You can also receive a dedicated flash drive containing the digital catalogues; should you need one, please contact one of our Sales Representatives.

You are welcome to find out more about our offering.

We have been developing our portfolio
for over 25 years according to our customers'
expectations and requirements.

This has been 25 years of expertise and experience building, mainly on the job. This period represents our perfect knowledge of the market, its specifics and needs, translated into innovative solutions. It also stands for reliability, dependability, and

high quality that makes work easier for thousands of users every single day. This is Modeco Expert – tools designed not only for professionals. Our product portfolio spans 8 categories dedicated to different segments of construction work,

◀ **POWER TOOLS**

◀ **MEASURING** tools

▲ **CUTTING** tools

providing for virtually any and all kinds of activity that can be performed on site. The Modeco Expert catalogue begins with power tools. It is for their high quality, ergonomics, and reliability that they surely belong to the brand's most user-valued products. The dedicated power tool accessories, representing a separate category, fully cater to even the most demanding requirements of professionals, offering them failure-free operation and durability.

One of the most extensive categories in the Modeco Expert catalogue is that of basic tools, which are absolutely indispensable at every home or workshop, and which both DIYers and professionals genuinely appreciate for their exceptional quality. The Modeco Expert branded connecting tools such as staplers, riveters or crimping tools for drywall systems guarantee outstanding convenience in use. They make frequently troublesome, yet indispensable, jobs of carpenters, roofers, plasterers, or tile setters as convenient as they never have been.

All kinds of spanners, from ordinary flat spanners to torque spanners, can be found among our mechanical tools and automotive products. The highest quality and durability materials used in their production

make the use of the Modeco Expert spanners not only more efficient, but also easier and more enjoyable. Both DIYers and professionals would like to be able to work with accuracy even down to 0.01 mm. That is why they appreciate the Modeco Expert measuring tools – their quality and precision confirmed by certificates and compliant with standards. The distinguishing feature of our construction tools, on the other hand, is their exceptional ergonomics, making the progress at every stage of construction faster, easier, and more comfortable.

The Modeco Expert cutting tools are suitable for both professional and household workshops. Reliable and safe, in the first place, they will come in handy for many years.

From power tools, along with their dedicated accessories, to basic, measuring, mechanical, and connecting tools, to construction and cutting tools – every Modeco Expert product has been designed and developed according to the highest quality standards by making the most of our extensive know-how, built for long years. They all stand for professionalism, reliability, and innovative solutions within your reach, whether you are a professional or a DIY enthusiast.

ANGLE GRINDERS

The Modeco Expert power tools portfolio is designed for a wide range of users. These devices meet the expectations of both beginners and advanced DIYers, offering best-in-class performance on a daily basis.

The design of the Modeco Expert power tools is based on proven technical solutions combined with great attention to technical inspection at every stage of production. Good concept and use of top-quality materials along with meticulous quality control guarantee failure-free operation and user satisfaction. The Modeco Expert brand also provides the customers with after-sales service according to the highest standards. In the warranty period, the Modeco Expert technical support unit ensures quick and professional troubleshooting and elimination of defects. Once the warranty period lapses, the Modeco Expert technical

support services make sure that spare parts are available for all models currently on the offering, but also for discontinued equipment. We also provide technical advice and assistance in choosing the right spares for our products. One of the most attractive lines of the Modeco Expert power tools is the 18V Modeco System family of battery-powered devices, offering users a wide range of diversified equipment powered by one type of 18V Li-ION battery. They are characterised by state-of-the-art solutions, high performance, and impressive durability.

WOODWORKING

**HEAT GUNS,
SOLDERING GUNS,
GLUE GUNS**

The Modeco Expert drills and stirrers are proven designs offering parameters tailored to the needs of demanding users, including DIYers, installers, carpenters, electricians, bricklayers, and tile setters.

The drills are intended for both non-percussion drilling in metal, wood, and plastics, and percussion drilling in materials such as lightweight concrete, masonry, brick, and stone. Stirrers, on the other hand, provide the support you need when mixing mortar, paint, and plaster. The high quality of the components used in the products of this family guarantees their reliability.

A product that stands out in the Modeco Expert offering is the MN-90-035 850W universal hammer drill. Its main advantages include the aluminium body, which increases the device's durability and improves heat dissipation, and the 1.5–13mm drill chuck, allowing you to use a wide range of drills and matching accessories.

RIGHT/LEFT ROTATION CHANGE

making it possible to remove drill bits as well as screws and bolts from materials more easily

3 METRES LONG CABLE

providing the operator with freedom to work without having to carry the power source

ALUMINIUM BODY for improved tool durability and heat dissipation

ROTATIONAL SPEED CONTROL

allowing you to adjust the tool's parameters to the job at hand

SIDE HANDLE CONNECTING PIECE MADE OF METAL

enabling you to apply greater force to the material being drilled in thanks to increased material strength

POWER TOOLS

Drilling in hard construction materials requires adequate power tools. The Modeco Expert brand delivers a range of modern SDS-Plus rotary hammers for demanding users. The high performance of the hammer mechanisms we use and the quality of workmanship will satisfy demanding DIYers and craftsmen.

Among the most popular solutions from Modeco Expert is the MN-90-222 800W SDS-plus rotary hammer. It is suitable for a wide range of applications thanks to its replaceable chuck. Featuring an electro-pneumatic impactor, it ensures high energy of the drill bit impact which translates into increased drilling speed. Another advantage of the rotary hammer is a feature which allows you to unlock the chisel position in the chuck and so adjust the chisel working angle.

**FOUR OPERATING MODES
(DRILLING, HAMMER DRILLING,

Cordless Devices solutions are growing in popularity among power tool users. To meet the expectations of DIYers, Modeco Expert offers a wide range of power tools powered by lithium-ion batteries. The all new Modeco System 18V LI-ION line comprises a wide selection of state-of-the-art power tools while ensuring full compatibility of batteries and chargers.

▲

The 18V LI-ION Modeco System guarantees quality and durability of the power tools and allows you to save money at the same time. What the system also stands for is an impressive diversity of configurations and the users' capacity to define the tool's technical parameters – they can easily choose the right power tool and equip it with the selected battery pack and charger of their choice.

POWER TOOLS

Angle grinders – representing one of the most popular groups of power tools on our market – are subject to demanding strength tests. The models delivered by Modeco Expert are designed to ensure robustness and reliability, without compromising cost-effectiveness at the same time. This means that they are perfect solutions for demanding DIYers and craftsmen looking for ergonomic products of good quality.

This group of power tools includes the versatile 1200W two-hand angle grinder matching 125mm discs with a speed control feature, designed for more demanding and prolonged applications. It has the advantage of an ergonomic two-hand construction with a rubberised anti-slip handle for improved comfort and safety.

3 METRES LONG CABLE

providing the operator with freedom to work without having to carry the power source

3-POSITION SIDE HANDLE

providing more secure grip, increased safety, and improved ergonomics as well as working precision

ERGONOMIC DESIGN with safety switch to prevent accidental start-up

ROTATIONAL SPEED

CONTROL allowing you to adjust the tool's parameters to the job at hand

KEYLESS GUARD

ATTACHMENT for quick position change without additional tools

Modeco Expert provides systems intended for sanding of gypsum finish plaster. These products are designed specifically for gypsum drywall working. Our selection of rotary sanders comprises products for sanding of wall and ceiling surfaces as well as corners. The Modeco Expert vacuum cleaner for gypsum dust, on the other hand, is characterised by a compact design and high resistance to the harmful effects of gypsum dust.

A product which clearly stands out in our portfolio is the MN-93-225 600W giraffe-type drywall sander. Its definite advantage is the possibility of adjusting the handle length (1100 - 1650 mm) which makes sanding of ceilings and walls otherwise beyond the operator's reach convenient and safe. It is also important that the sander features a disc speed control system which allows you to adjust its working speed to the substrate and the job specificity. Additionally, the design of the hinged and motorised sanding disc unit allows the disc to evenly adhere to the material being sanded.

LOWER HANDLE that can be hooked onto a tool belt while work is conducted, freeing the operator's hands, which significantly reduces work fatigue

4-METRE POWER CABLE significantly expanding the working area without moving the power source

FOLDING SANDER BODY AND ATTACHED TRANSPORT CASE for convenient and safe handling and storage

CIRCUMFERENTIAL SANDING DISC BRUSH

preventing dust from escaping and reducing damage to the surface being sanded

DUST EXTRACTION SYSTEM

ensuring reduced dustiness inside the room and better working conditions once connected with a vacuum cleaner via an attached tube

POWER TOOLS

The Modeco Expert line of heat guns includes both step-adjusted tools and devices featuring advanced stepless electronic temperature and airflow control. All these models are characterised by high quality and ergonomics that cater to the users' requirements.

The Modeco Expert range of hot melt glue guns and soldering irons will meet the expectations of all those looking for an efficient tool for repair and decoration work.

They include the MN-94-009 2-speed heat gun with a capacity of 2 000W. It stands out for its 6-step parameter adjustment system, visualised by LEDs, making it possible to adapt working temperature to the job at hand. The heat gun design enables you to set it vertically as a stationary device and to handle the material with two hands.

AIR FLOW ADJUSTABLE TO 550 L/MIN IN BOTH SPEEDS

providing high blowing power for more efficient work

LIGHTWEIGHT AND DURABLE BODY

ensuring robustness and reducing fatigue at work

TWO SPEEDS

allowing you to adjust working temperature in the range of 50–350°C (with 50°C increments) and in the range of 100–600°C (with 100°C increments), respectively

DIVERSITY OF ACCESSORIES:

4 nozzles, spatula and scraper allowing for a wide range of works to be conducted without having to buy additional tools

Cutting, sanding, planing – you can effectively perform all these operations without hassle using the Modeco Expert power tools.

Our woodworking machines will prove perfect for larger refurbishment and construction jobs as well as more precise renovation and decoration work. Workshop vacuum cleaners will help you to keep the workplace tidy while increasing its comfort and safety at the same time.

The advanced MN-92-103 800W jigsaw featuring a laser guide and cutting adjustment clearly stands out in the Modeco Expert offering. The product's main advantage is the possibility of controlling the blade working speed, which enables precise control and adjustment of the device parameters to the material being cut.

VACUUM CLEANER 30 L 1200W

POWER TOOLS

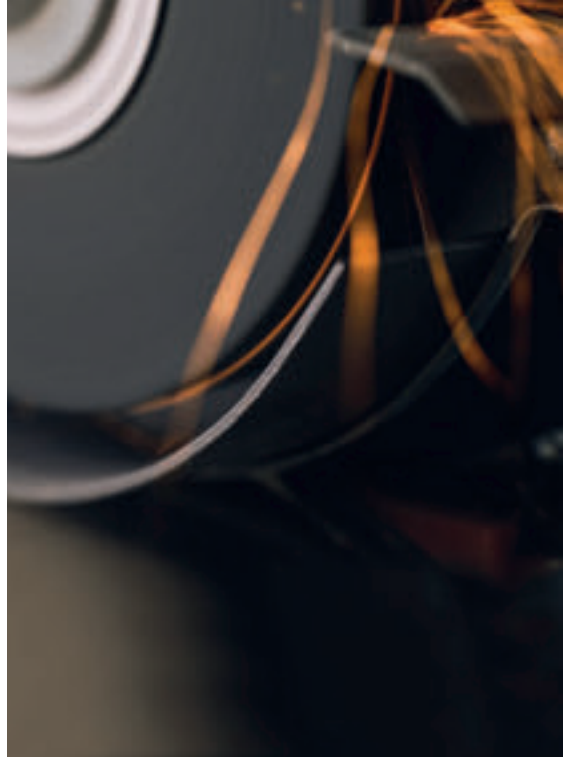

VACUUM CLEANER FOR GYPSUM DUST

The supplementary products from Modeco Expert include both highly specialised and universal devices that can be used for renovation work, at workshops or at home by DIYers.

One of such products is the MN-92-405 380W shears for metal sheets. Their advantage is the switch lock which allows you to work for a long time without having to hold the trigger pressed, which affects the comfort and safety of use. The tool's special design lets you quickly cut corrugated and box profile metal sheets in different directions.

METAL BODY increasing tool's durability and improving heat dissipation

3-METRE LONG CABLE providing the operator with freedom to work without having to carry the power source

SWITCH LOCK to let you work for prolonged periods without having to hold the trigger, improving the comfort and safety of use

SPECIAL DESIGN for quick cutting of corrugated and box profile sheets in different directions

Submersible pump designed for pumping clean and dirty water

An adjustable length float switch turns the pump on and off according to the water level

The water connection allows the connection of hoses of various diameters

Power	1100 W
Max. immersion depth	7 m
Max. lifting height	11 m
Max. efficiency	15 500 l/h
Min. water column height	9 cm
Max. temperature of water	35°C
Max. the size of the contamination	25 mm
Cable length	10 m

index		5906675
	pcs	
MN-99-921	1	022079

For indoor use

cable length	10 m
cable profile	3x1,5 mm ²
max power of connected devices	
expanded cable	3 000 W
retracted cable	1 000 W

index		5906675
	pcs	
MN-99-922	1	022093

For indoor and outdoor use

cable length	25 m
cable profile:	3x1,5 mm ²
max power of connected devices:	
expanded cable	3 000 W
retracted cable	1 000 W

Power tools are relevant to both professionals and do-it-yourselfers, yet without properly fitted power tool accessories they cannot perform as expected.

That is why Modeco Expert have made sure that every user of the brand's power tools has also access to the necessary accessories. To meet the customers' requirements, the brand has created a series of bits, sockets and adapters. The offering includes PZ, PH, TORX, and HEX bits made of high quality S2 steel of hardness ranging at 56–62 HRC. Modeco Expert also offers coated abrasive

accessories, grinding discs, as well as corundum and diamond grinding wheels. Additionally, our portfolio has been extended with product groups that include cutting, bonding and mixing products. They stand out for their high quality which guarantees high performance and durability, which are all extremely important properties in products of this type.

SCREW EXTRACTORS

Modeco Expert offers a portfolio of high-quality and durable drill bits that come in a wide range of sizes.

They can be used for drilling in steel and hard metals, concrete, stone, brick, hollow masonry units, or wood. Thanks to the variety of their applications, available sizes, as well as high quality, they can be successfully used by bricklayers, roofers, masons, fitters, and DIYers alike. Depending on the chuck type, the drill bits are intended for drills, cordless drill drivers as well as rotary hammers. The most popular products in the line are four-cutter drill bits for concrete, fitting into the SDS PLUS and SDS MAX chucks. They feature a characteristic monolithic four-cutter carbide tip that enables drilling in very hard concrete and a centring point allowing you to quickly start drilling without the bit slipping.

MONOLITHIC FOUR-CUTTER CARBIDE TIP enabling you to drill in very hard concrete

ADDITIONAL DRILL BIT SPIRAL GROOVE for faster extraction of drillings and increased drilling speed

DEEP-SEATED SINTERED CARBIDE element for prolonged service life

SDS-PLUS and SDS-MAX CHUCK ensuring that the product matches most of the rotary hammers available on the market

48-51 HRC HARDNESS for longer life

AUTOMATIC HARDENING AT 1200°C that significantly increases material performance and strength

Basic tools are indispensable in every household and workshop. With their help, any DIYer can easily handle the repair of many defects.

Basic tools are easy to use, making it possible to work quickly and efficiently, let alone effectively and, most importantly, safely. The range of the Modeco Expert basic tools comprises high-quality tools made of good-quality materials and alloy steels. There is something for everyone – from professionals, who provide their services on a large scale, to DIYers. Their main targets include fitters, mechanics,

electricians, plasterers, DIYers, roofers, road builders, tile setters, plumbers, joiners, and steel fixers. It is for them that we have designed and developed the Modeco Expert selection of basic tools including screwdrivers, voltage testers, pliers, cutters, pipe spanners, hammers, vices, and clamps.

The work performed by electricians involves occupational hazards associated with the maintenance of indoor and outdoor electrical equipment and systems as well as with building construction.

What we can do to increase the safety and comfort of their work is to provide suitable products catering to the needs of this professional group. The Modeco Expert electrician's tools are characterised by high durability, human engineering properties that improve work quality and comfort, and multi-functionality, which translates into fewer individual tools in an electrician's toolbox.

The Modeco Expert electrician's tools featuring 1000V insulation ensure efficient and safe work. In this product group, both professional electricians and DIYers will find products that meet their specific needs. Additionally, the Modeco Expert group has created a series of tools that allow you to perform additional wire working activities. These include a specialised high-precision telephone and network terminal crimping tool, an automatic wire stripper dedicated to cables of various diameters, and a cable crimping tool featuring a high-precision automatic press.

STILLSON ADJUSTABLE PIPE WRENCH

The most essential and popular product that comes in handy in most home and workshop repair works is a hammer.

Depending on the application, the best choice appears to be either a hammer with a metal face and a handle made from one piece of forged induction-hardened steel (monoblock) or a hammer with a fiberglass handle. These characteristics guarantee lifetime durability and vibration dampening that significantly increases working comfort. With safety and convenience of use in mind, we have equipped our hammers with durable rubber-coated handles ensuring anti-slip properties, which guarantees secure grip, and a hammer face featuring a magnet which makes it easier to hold the nail being driven.

HAMMER FACE AND HANDLE MADE FROM ONE PIECE of induction-hardened material for supreme product durability

WEDGE-SHAPED INDENTATION BETWEEN HAMMER CLAWS for easier nail pulling

RUBBER-COATED AND ERGONOMICALLY SHAPED HANDLE with anti-slip properties for secure grip

MAGNETIC HAMMER FACE, making it easier to hold the nail being driven

SPRING CLAMP

The Modeco Expert branded connecting tools include, above all, staplers, riveters and crimping tools for drywall systems. They are appreciated for their high quality, durability, and convenience in use.

The riveters are intended for joining two independent pieces, such as elements of brackets, shields, or enclosures, by means of rivets and rivet nuts made of steel, stainless steel, aluminium, or copper. They come in handy wherever DIYers, carpenters, installers, and carpenters perform their job. Staplers are tools used to join materials

by puncturing them, and these materials include wood, fabric, paper, or foil. Special clips or nails of different sizes and types are used for this purpose. Their main application is professional upholstery work, but they also come in handy in household and decoration activities.

One of the most highly valued items in the Modeco Expert portfolio of connecting tools is our metal hand stapler, suitable for a wide selection of pins ranging in sizes from 4 to 14mm, making it possible to join materials of various thicknesses.

It proves most useful at workshops of upholsterers, joiners, roofers, or DIYers. It is typically used for quick joining of different materials, such as wood, fabric, paper, and foil. It features a stepless impact force control function, which makes it possible to adjust the pin driving force depending on its length and material hardness. Another advantage of the stapler is the content viewing capability that allows you to keep track of the number of pins left in the tool magazine without having to stop working.

STEPLESS IMPACT FORCE CONTROL

allowing you to adjust the pin driving force depending on the pin length and material hardness

ANTI-SLIP HANDLE

for comfortable and safe use

STEEL BODY

ensuring long service life

PIN COUNT VIEW enabling you to check the number of pins in the magazine without having to stop working

HEX KEY SETS

Mechanical tools and automotive products are essential in every garage and workshop. They are typically used by DIYers, but also by professionals in car mechanics, plumbing, and installation.

It is extremely important that these tools are reliable, made of durable top-quality materials, and ergonomic. And these are precisely the tools delivered by Modeco Expert. The brand's offering comprises adjustable spanners, open-ended spanners, open-ended/box (combination) spanners, open-ended/socket spanners, torque spanners, ratchet spanners, adapters and

sockets, intended for all kinds of mechanical and installation works. Users can either customise their tool sets themselves by choosing spanners of specific sizes or use professional ready-made sets. Whatever their choice may be, the products they pick will make their work efficient, satisfying, easy, and faster.

WRENCHES**

The most common spanners used, for example, in workshops are combination spanners. They are designed for tightening and loosening of hexagonal bolts and nuts.

The Modeco Expert brand's flagship product is an entire series of combination spanners. Made of high-grade chromium-vanadium steel, they provide long service life and durability. The products feature the MAXXDRIVE system ensuring safe transfer of maximum torque to the bolt or nut. This provides for secure grip of the fastening pieces being screwed in or out. Some additional user advantages are that the products are covered by a 5-year manufacturer's warranty, and that they are manufactured in line with the DIN 3113 standard, which guarantees the high quality of the product make.

HIGH-GRADE CHROMIUM-VANADIUM STEEL ensuring long service life and durability

SATINISED AND POLISHED SURFACE FINISH protecting spanners against corrosion

MAXXDRIVE SYSTEM for safe maximum torque transmission to bolts

MANUFACTURED IN LINE WITH DIN 3113 to guarantee high standard of product workmanship

TAPE RULES ▶

MEASURING TAPES ▶

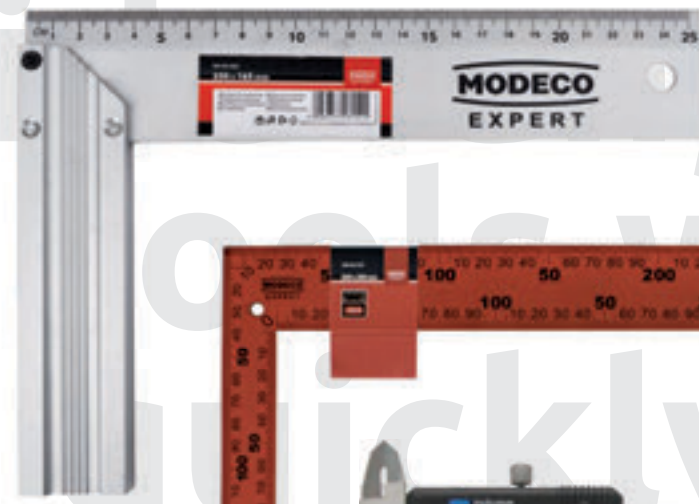

Measuring instruments must be accurate because they are often used in renovation and finishing work, as well as on construction sites. They make it easy to determine and check the dimensions of parts or clearances.

Modeco Expert delivers a wide range of measuring tools which allow you to quickly and conveniently check the length of cut pieces or measure distances. These include high-quality and high-precision measuring tapes, retractable and folding measures, callipers, and angle gauges. They give you the certainty that no mistakes or errors are

made during DIY work at home or at the construction site.

Users truly appreciate working with the Modeco Expert measuring tools whose quality and accuracy are confirmed by the certificates they have received and the standards they meet.

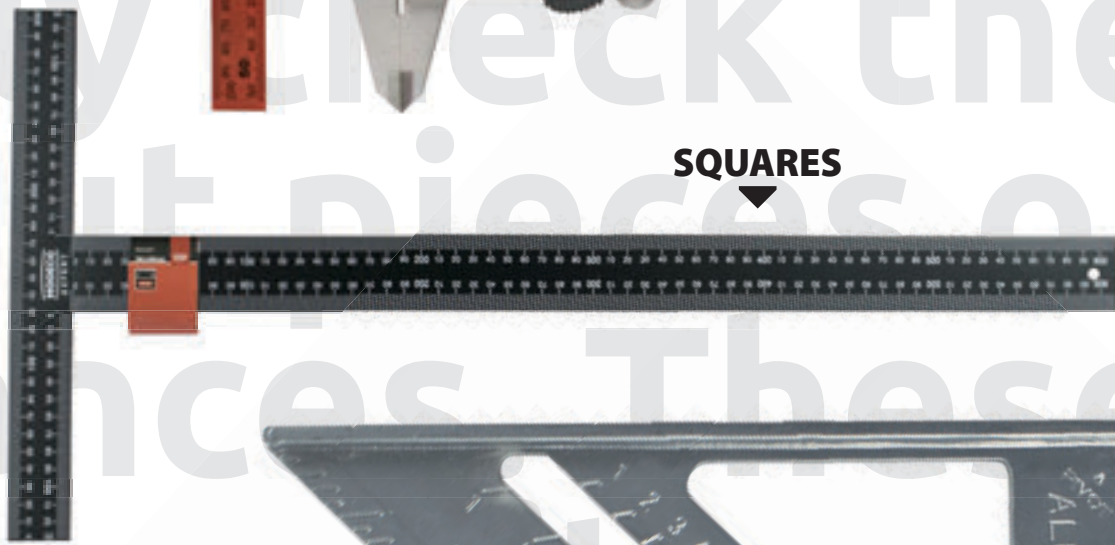

MEASURING TOOLS

FOLDING RULERS

Retractable measuring tapes perform an important function in construction or any kinds of renovation works. They are designed for measuring distances that do not exceed 10 metres.

Our construction measuring tapes are used by both builders and do-it-yourselfers. In order to meet the customers' requirements, the Modeco Expert offering includes the most accurate measuring tape, PRO CHROM, which complies with the stringent conditions of the EU standards for Class I accuracy. It proves indispensable in most construction and repair works. It features a special tape coating which prolongs its service life and reduces the potential abrasion wear. On top of that, the white measuring tape is well visible during measurements. It is available in three lengths: 3m, 5m, and 8m.

RUBBERISED CASING

for increased shock resistance

SLIDE LOCK

ensuring improved retraction control and extended life

CHROMIUM-PLATED BODY

for maximum durability

WHITE MEASURING TAPE

ensuring good visibility during measurements

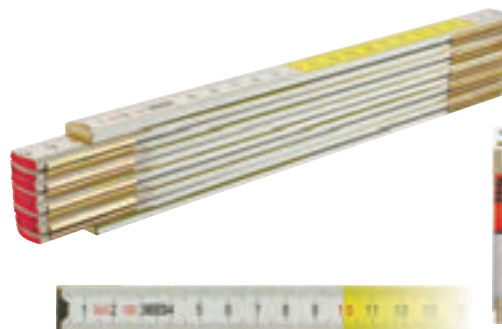

MEASURING TAPE COMPLIANT WITH STRINGENT REQUIREMENTS OF EU STANDARDS AND HIGH ACCURACY CLASS (admissible measuring error of $\pm 0.3\text{mm}$ per 2m)

SPECIAL ADDITIONAL TAPE COATING for extended service life and reduced abrasion wear

Work organisation at construction sites or even at home, during renovation work, is a very important stage that actually marks the onset of every project. What matters is to make sure that the high-quality tools delivered by Modeco Expert are securely stored in appropriate conditions, so that they can serve their purpose for a long time.

Construction tools prove useful at every stage of construction work. Additionally, once the project is completed, you can use the tools to create your own structures in the garden or workshop. But it is important to remember that they should be properly secured and maintained, as it affects the comfort and quality of work. The Modeco Expert offering of construction tools is extremely diverse and wide. Some more

products worth special attention are high-quality construction floats intended for sanding, smoothing, and troweling of plasters, as well as for finishing of plasters, mortars, and adhesives. To make sure that the surface thus obtained is even, it is necessary to set a level or plumb line using a spirit level. When the work is done, we recommend you to store smaller tools in dedicated containers.

SCRAPERS AND TROWELS

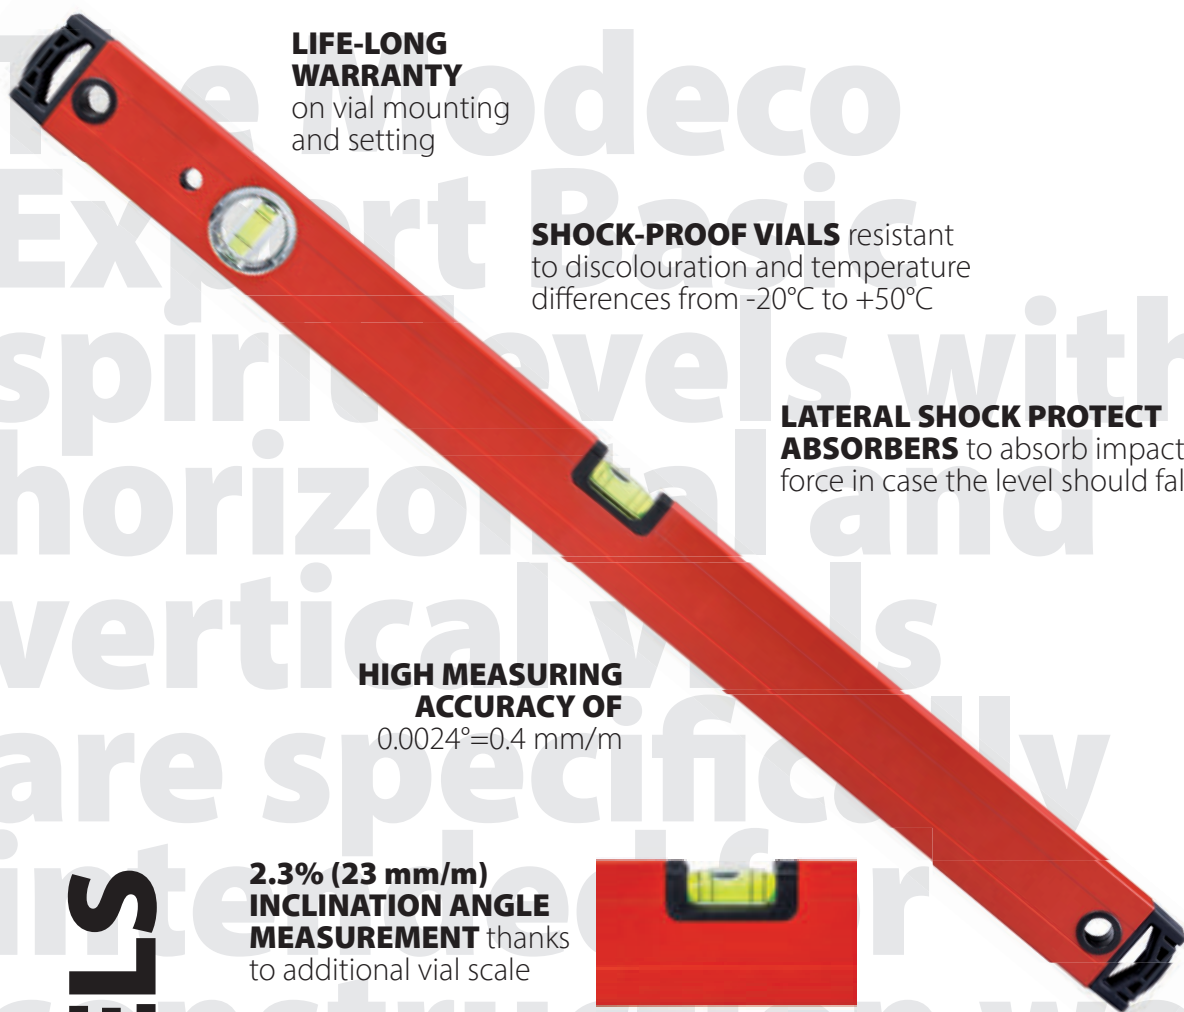

Levels with vials are measuring tools that can be used to mark out a level, a plumb line, an angle of 45°, or an inclination on a surface. They differ in length, number and type of vials, number of handgrips, and cross-section.

The Modeco Expert Basic spirit levels with horizontal and vertical vials are specifically intended for construction work. Their high measurement accuracy of 0.4 mm/m is guaranteed by the shockproof vials. The level vial is made according to an innovative design that ensures easy and quick reading, regardless of the viewing angle. It also has additional rings, as a standard feature, allowing you to establish a 2.3% inclination.

Modeco Expert is committed to high quality, which is why our spirit levels are covered by a lifetime warranty on the vial gluing and the side shock absorbers. Powder coating additionally protects the tool's corrosion-resistant aluminium profile against scratches, while the profile ribbing increases torsion resistance and provides increased resistance to bending. Having gentle shapes and no sharp edges, the tool is extremely easy to clean.

TROWELS FOR EXTERNAL EDGES

NEW

Construction floats are tools widely used in renovation and construction works. They are used for applying, trowelling, grinding and smoothing mortars, adhesives, plasters and finishing coats.

Each user - a DIY enthusiast, a tiler, a painter and a bricklayer, will appreciate the high-quality workmanship of the floats and the fact that each of them, regardless of the type and the purpose, has an ergonomic, two-component and cambered handle. This is what improves the comfort of work, which is extremely important in the case of construction and finishing works. The Modeco Expert float with a specially made durable grater is designed for grinding polystyrene boards. It is made of hardened plastic, which ensures rigidity of the structure during operation. It is distinguished by a lightweight, through-hole design that ensures easy cleaning and a longer tool life.

ERGONOMIC, TWO-COMPONENT AND CAMBERED HANDLE

improves the comfort of work

**FLOAT WITH A SPECIALLY MADE
DURABLE GRATER** is designed for
grinding polystyrene boards

**MADE OF HARDENED
PLASTIC**, which ensures rigidity
of the structure during operation

**LIGHTWEIGHT,
THROUGH-HOLE DESIGN**
that ensures easy cleaning
and a longer tool life

The Modeco Expert Multi Storage System is a perfect solution for all hand tool users.

Seeking to organise and protect your tools, so that they are also available for everyday repair work, you will surely appreciate the Multi Storage System of modular portable toolboxes from Modeco Expert. The system consists of 7 elements: 2 alternative transport systems – a wheeled box and a transport platform, a toolbox, a larger and a smaller open box, and two organisers.

To accommodate each user's unique needs, the system comprises boxes of 3 sizes and capacities of 14.3, 26, and 38 litres, allowing you to choose the right size to suit your individual preferences. But the greatest advantage of the MULTI STORAGE SYSTEM is that all boxes are fully compatible with one another, so you can stack them like bricks, one on top of the other, to build your customised set.

3 BOX CAPACITIES: 14.3, 26, and 38 l

REMOVABLE INNER COMPARTMENT SEPARATORS for easy space organisation

HIGH-PRECISION POLYAMIDE LID LATCHES without sharp edges

COMPATIBLE BOXES which can be stacked like bricks, one on top of the other, to build customised sets

2 ALTERNATIVE TRANSPORT SYSTEMS featuring a wheeled box and a transport platform

MODULAR PORTABLE TOOL BOX SYSTEM consisting of 7 components

TELESCOPIC WHEELED BOX HANDLE for easy transport and storage

◀ **SHEET
METAL SHEARS**

Some of the most typical activities performed in workshops and on construction sites are wood working as well as cutting of metal, aerated concrete, plasterboard, and wood-based materials

Because of such a wide range of applications, one should always rely on cutting tools whose high quality is guaranteed by the manufacturer. And this is precisely the case of the Modeco Expert cutting tools. The Modeco Expert portfolio includes knives, shears, cold chisels, saws, thread cutters, and wood chisels. They are safe and comfortable to use, and made of solid materials such as stainless steel and tool steel. The Modeco Expert knives can be used in both household and professional workshops. They differ not only in construction,

but also in the blade type, which directly affects their application and handling. Our offering includes aluminium and two-component knives with trapezoidal, trapezoidal-hook, and broken blades. Some tougher materials, such as metal sheets and steel sections, can be successfully worked using the Modeco Expert shears, which are divided into left- and right-handed, depending on the blade geometry. Thanks to their articulated design, less force is required during cutting, which makes the work easier.

NÓŻ DO WEŁNY MINERALNEJ

Our flagship product in the family of cutting tools, designed for cutting of metal sheets, steel profiles, metal roofing tiles, etc., is the 250mm long sheet metal shears made of chromium-molybdenum steel.

These are typically used by roofers, electricians, plumbers, and fitters. Their distinguishing feature is the articulated construction which makes cutting easier and requires less force. The automatic jaw lock secures the shears during transport and allows one-handed opening. The two-piece handle improves grip ergonomics and increases comfort of use.

FORGED JAW MADE OF CRO-MO STEEL WITH HARDNESS OF 56-62 HRC ensuring extended service life and making it possible to cut sheet metal up to 1.8mm in thickness

PROFILED JAW enabling perfect cutting in a straight line and to the left

AUTOMATIC JAW LOCK securing the shears during transport and allowing one-handed opening

ARTICULATED DESIGN for easier cutting (less force required)

ERGONOMICALLY PROFILED TWO-COMPONENT HANDLE for improved comfort of use
